waypoints[0]

END

waypoints[n-1] – the route between them is derived

MIDPOINT

insert a mid – the route re-derives through it

REMOVED

remove it – nothing else had to be told

SHAREABLE

the list is the whole serialization

ONE STREET

17 OSM edges – roadway, both sidewalks, crossing stubs

TEN VOTES

ten people, ten different edges, ten faint marks

ONE BLOCK

every edge belongs to exactly one block

COUNTED ONCE

one device counts once per block per vote type

QUIET

a block with no conclusion carries no heat

SUPPORT

point-level support answers where, not what

SEED

start from the heaviest block

CORRIDOR

grow off either tip while the votes pay for the metres

GHOST WAYPOINTS

pin the tip where routing would not hand it back

?w=◆;◆;◆;◆;◆&vt=Add+protected+bike+lane

FIVE WAYPOINTS

two anchors + three ghosts – a proposal you can share and walk

NOT WHERE PEOPLE ARE.
WHERE A CITY HAS REACHED A CONCLUSION.
